

Add or/and edit Name Servers (DNS)

1. Sign in to your account (either with owner, administrative or technical contact email)
2. From the menu select
 - **Domain list**
 - **My domains**

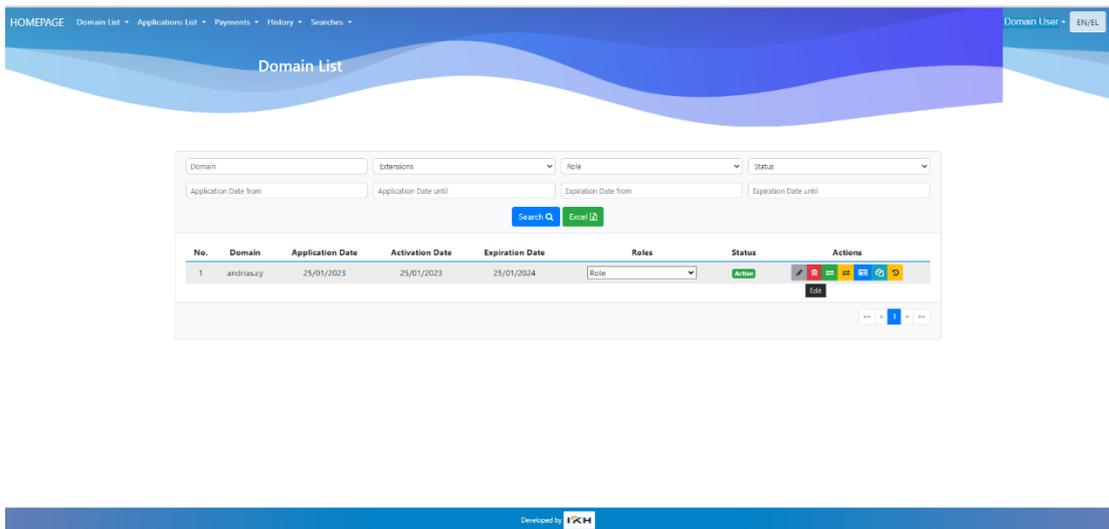

The screenshot shows the 'Domain List' page in the Registry .cy interface. The page has a blue header with navigation links: HOME PAGE, Domain List, Applications List, Payments, History, and Searches. A 'My Domains' button is visible. The main content area displays a table with the following data:

No.	Domain	Application Date	Activation Date	Expiration Date	Roles	Status	Actions
1	andrius.cy	25/01/2023	25/01/2023	25/01/2024	Role	Active	[Icons for Edit, Delete, Refresh, etc.]

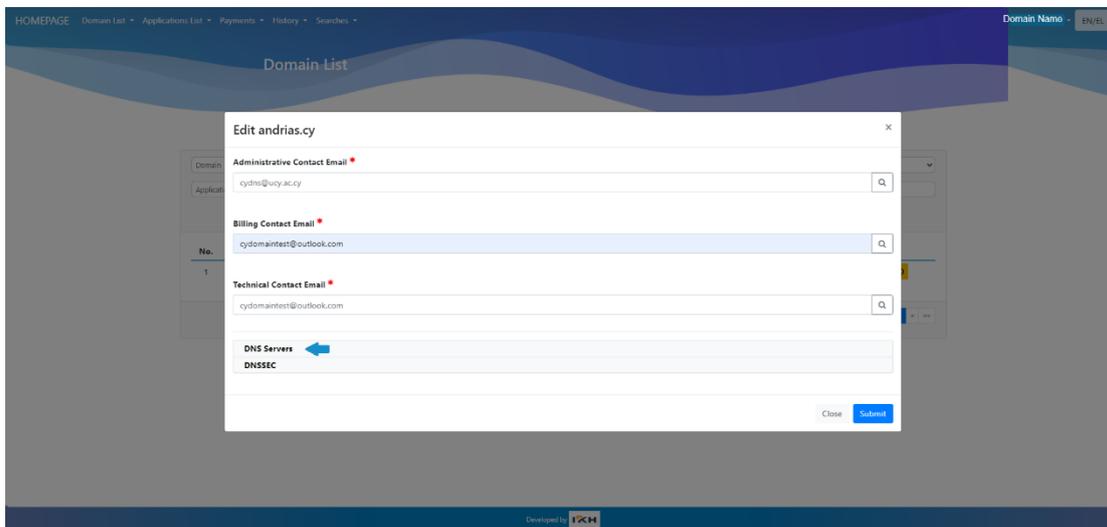

Search filters include: Domain, Extensions, Role, Status, Application Date from, Application Date until, Expiration Date from, and Expiration Date until. There are 'Search' and 'Excel' buttons.

3. To **Edit** press  under the “**Actions**” column.

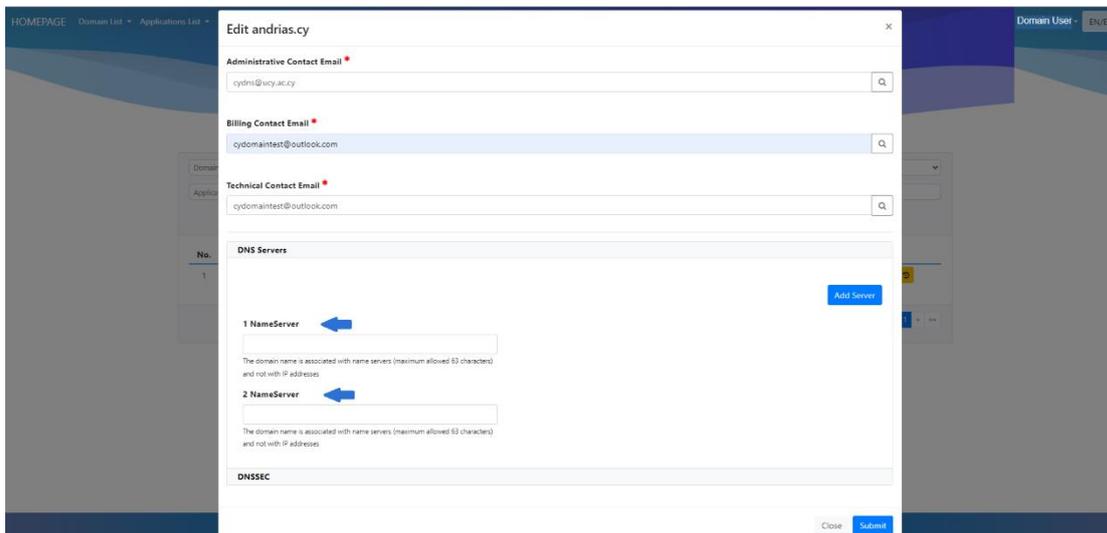

This screenshot is identical to the previous one, but the 'Edit' button (represented by a pencil icon) in the 'Actions' column of the table is highlighted with a red box, indicating the step to edit the domain.

4. The window below will be displayed on your screen. Press “DNS servers”.

5. The system will open two fields to add the Name Servers (DNS) given by your hosting provider. Minimum number for Name Servers (DNS) is two (2).

6. Complete the Name Servers (DNS)

Administrative Contact Email *
cydns@ucy.ac.cy

DNS Servers Add Server

1 NameServer
ns1.cloudflare.com
The domain name is associated with name servers (maximum allowed 63 characters) and not with IP addresses

2 NameServer
ns2.cloudflare.com
The domain name is associated with name servers (maximum allowed 63 characters) and not with IP addresses

DNSSEC

Close Submit

Press **“Submit”**

Note:

If the Name Servers (DNS) to be added are more than two (2), press the **“Add server”** button and the system will display additional fields for name servers recording.

DNS Servers (1) Add Server

1 NameServer
ns1.cloudflare.com
The domain name is associated with name servers (maximum allowed 63 characters) and not with IP addresses

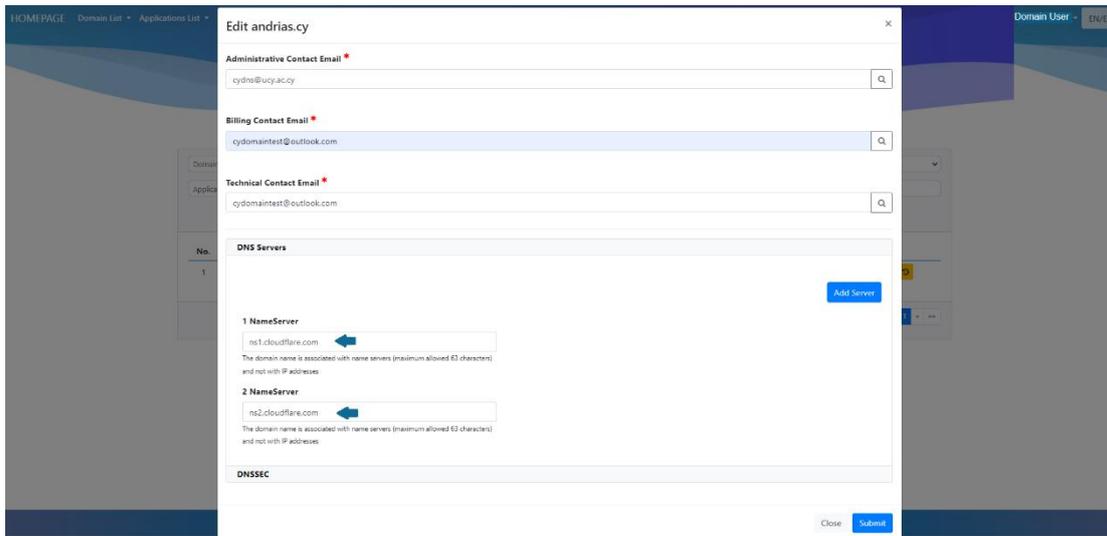

2 NameServer
ns2.cloudflare.com
The domain name is associated with name servers (maximum allowed 63 characters) and not with IP addresses

3 NameServer
ns2.cloudflare.com
The domain name is associated with name servers (maximum allowed 63 characters) and not with IP addresses

DNSSEC

Close Submit

- To change or edit the current DNS Servers of your domain, the same procedure as adding must be followed.

When you press the DNS Servers, the current DNS Servers will be displayed. You may change to new DNS or edit the current ones accordingly.

8. Important Note

If the DNS Servers to be recorded have .cy extension, then the IP addresses of these servers have also to be recorded (see below)
